

Metals Testing Company

News Release

Metals Testing Company Ultrasonic Testing Services Rolls-Royce Approved

Metals Testing Company (MTC) is now approved to provide Ultrasonic Testing (UT) for Rolls-Royce (R-R) related parts. The approval specifically applies to the UT inspection in accordance with RPS 705. The first applications of the R-R approval have been to perform turntable related immersion testing of gas turbine engine disk forgings in their sonic shapes.

MTC, located in South Windsor, CT (USA) provides NDT laboratory inspection services to various markets ranging from aerospace to automotive industries. Their in-house capabilities include immersion and contact ultrasonics (UT), chemical etch and etch anodizing, Eddy Current (EC), fluorescent penetrant inspection (FPI), and magnetic particle inspection (MPI). With regard to aircraft engine manufacturers, MTC is one of the few approved independent laboratories in the world for providing Blue Etch Anodize (BEA) inspections. MTC also has a broad range of UT C-Scan inspection capabilities.
